-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102 and 35 USC § 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Anderson et al.
4. Anderson et al. teaches (independent claims 1 and 6) a computer-based method for maximizing redemption award units in an award program (para. [0026]), but Anderson et al. does not explicitly teach a shortfall percentage and storing said shortfall percentage. However, under the principles of inherency (MPEP § 2112.02), since the reference invention necessarily performs the method claimed, the method claimed is considered to be anticipated by the reference invention. As evidence tending to show inherency, it is noted that the reference teaches *the number of points needed* (bottom of para. [0027]), which is the mathematical equivalent of a shortfall percentage. Alternately, because percentages are sometimes more meaningful and convenient to work with than absolute values, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add to the teachings of Anderson et al. the storage and display of *the number of points needed as a shortfall percentage.*

5. Anderson et al. does teach *AwardPoints* as a *generic, convertible currency* (para. [0037] and Merriam-Webster's Online Dictionary), which reads on determining a monetary amount. The reference also teaches "a multiplication factor" (*ratio*) in order to combine *several types of award points* and convert them to *AwardPoints* (para. [0031], [0053] and [0054]).
6. Anderson et al. also teaches at the citations given above claims 2-4 and 7-9. The multiplication factor (*ratio*) is the same (claims 2 and 7) when dealing with only one type of point. The multiplication factor is different and weighted (claims 3-4 and 8-9) when dealing with at least two types of points.
7. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as obvious over Anderson et al. Anderson et al. does not teach that the multiplication factor is selected based on chance. Official notice is taken (MPEP § 2144.03) that it was common, at the time of the instant invention, to use chance as a basis for incentive programs. Because there are people especially motivated by games of chance, and the multiplication factor (*ratio*) is a convenient coefficient for introducing chance into the incentive program, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add to the teachings of Anderson et al. that the multiplication factor is selected based on chance.

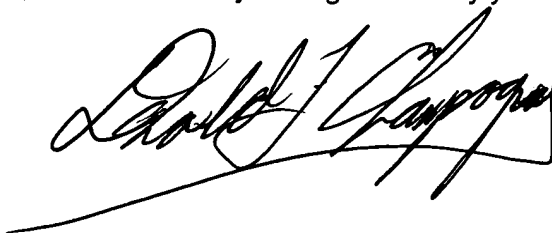

Conclusion

8. **COPY of REFERENCES** - Applicant is entitled to receive a copy of every reference cited by the examiner (except at allowance; MPEP 707.05(a)). Applicant should contact the examiner if a completed form PTO-892 is enclosed, but the cited references are not.
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald L Champagne whose telephone number is 703-308-3331. The examiner can normally be reached from 6:30 AM to 5 PM ET, Monday to Thursday. The examiner can also be contacted by e-mail at donald.champagne@uspto.gov, and *informal* fax communications (i.e., communications not to be made of record) may be sent directly to the examiner at 703-746-5536.
10. The examiner's supervisor, Eric Stamber, can be reached on 703-305-8469. The fax phone number for the organization where this application or proceeding is assigned is 703-872-
